TRUSTEES' REPORT.

To His Excellency the Governor and the Honorable Council.

The Trustees of the Worcester Lunatic Hospital respectfully submit their fifty-sixth annual report, together with the reports of the Superintendent and Treasurer. Throughout the past year the affairs of the hospital have been wisely and economically administered by the Superintendent, Dr. J. G. Park, and by his assistants. In February last Dr. Earle resigned the position which she had held since July, 1885. Dr. Laure Hulme, a graduate of the Woman's Medical College, Pennsylvania, was appointed to succeed Dr. Earle. In August Dr. John A. Houston resigned his place, having served the hospital for six years. Dr. Hartstein W. Page has been appointed his successor. Mr. George L. Clark, steward of the hospital for seven years, resigned his position in February. The duties of the steward call for a man of sound business capacity, and Mr. Clark's services were highly appreciated by the Trustees. Mr. Henry J. Bardwell has been appointed to fill his place.

By an act of the last General Court, the controversy concerning the driveway through the grounds of the hospital, on the shores of Lake Quinsigamond, was definitely settled. The Trustees felt themselves bound to represent to the

Legislature the inconvenience which would arise to the hospital from the proposed change, and they believed that their duty required them to urge that certain expenses connected with it should be borne by the city of Worcester rather than by the Commonwealth. They are, however, greatly pleased to see finally adjusted the diverging interests of a great and growing city and a large public institution needing a considerable degree of seclusion.

There has often been observed a growing tendency in the community to treat as insane many moral shortcomings which were formerly considered vicious. As was said in the report of the Superintendent, Dr. Park, for the year 1886, "The Act of 1885, authorizing the commitment of habitual drunkards to the State Lunatic Hospital, was the first step toward recognizing habitual drunkenness as a disease and not a crime." But we believe that even this recognition is not to be the end of the matter. The time will come when drunkenness will be recognized not so much as a disease in itself as the symptom of a deeply seated and general moral disease, which tends to plunge its victims into all sorts of indulgence and vice. This weakness or failure of the moral sense has other symptoms, though drunkenness is perhaps the most common. During the past year the Trustees have been considerably embarrassed by the presence in the hospital of persons who would formerly have been allowed to fall into vicious and criminal lives, not in consequence of definite mania or delusion on their part, but simply through this defective moral sense. Such persons, generally women, stand toward the hospital in much the same position as the habitual drunkard. Regarding both these classes the position of the Trustees is a difficult one. There is no use in shutting our eyes to the fact that in the majority of cases the defect is incurable. Such persons, while restrained in the hospital, are for the time sane both in mind and conduct, yet it is often almost certain that they will fall into drunkenness or other vice as soon as released. There are many such persons in the community, only a few exceptional cases having thus far found their way to the hospitals; and the Commonwealth will soon be forced seriously to consider if it desires to restrain these

men and women for the term of their natural lives, unless in any case a permanent cure is really effected. On one point, however, there is hardly room for doubt. Enforced and intimate association with the demented and the excited is not the proper method to secure for those morally defective either a complete recovery or such an alleviation of their symptoms as may often be hoped for when recovery is impossible; and, on the other hand, an association with the persons who make up the classes just referred to - lazy, shiftless, and often vicious as they are - is both distasteful and injurious to the insane, in the ordinary sense of the word, for whose cure and care our present hospitals were built. Both the drunkards and the other persons of whom we have spoken are often unruly, and very generally refuse the work which we cannot compel them to perform. presence and example are a serious obstacle to the maintenance of proper discipline among the insane.

During the past year we have suffered, in common with the other lunatic hospitals of the State, from the refusal of the several cities and towns to pay for the clothing used and the breakage caused by persons for whose support they were responsible. For a discussion of this matter we beg leave to refer to the report of the Superintendent, and to our own report in connection with the Worcester Insane Asylum.

ALBERT WOOD,

Treasurer.

SEPT. 30, 1888.

WORCESTER, MASS., Oct. 24, 1888.

The undersigned has carefully compared the Treasurer's statement of expenditures for the year ending Sept. 30, 1888, with the vouchers which are on file at the hospital, and found it to be correct. He has inspected the securities for the invested funds, and found them to correspond with the Treasurer's statement of their market value; and he has compared the statement of expenditures in the land account with the vouchers, and found it correct.

GEORGE L. CLARK, Auditor of Accounts.

SUPERINTENDENT'S REPORT.

To the Trustees of the Worcester Lunatic Hospital.

I herewith respectfully present the fifty-sixth annual report of the hospital, with the statistical tables giving in detail the operations of the institution for the year.

There were remaining in the hospital Sept. 30, 1887, 694 patients, -316 males and 378 females. The number of admissions during the year has been 389, - representing 375 persons, -205 males and 184 females, making the whole number under treatment 1,083. The daily average population has been 708.19. The largest number on any one day was 770, on September 29, and the smallest number 676, on October 27. Of this number, 14 have been readmissions, and the following transfers have been made from other institutions: from Danvers Hospital, 20 males and 20 females; Westborough Hospital, 1 female; State Almshouse, Tewksbury, 1 male and 3 females; State Prison, 6 males; Massachusetts reformatories, 1 male and 2 females; houses of correction, 8 males and 1 female; Bridgewater State Farm, 1 male. The number discharged has been 311, -139 males and 172 females, and one female was out on visit at the end of the year. Of this number, 81 recovered, of whom 9 had previously been inmates of this hospital and been discharged as recovered, -1 sixteen times, 1 three times, 3 twice each, and 3 once each, —the 9 persons representing 28 recoveries; 25 were discharged as much improved, some of whom made complete recoveries after leaving the hospital; 64 improved; 75 not improved; including 43 transferred by the Board of Lunacy and Charity to Westborough Insane Hospital, Tewksbury Almshouse and Boston Lunatic Hospital. Five males and 2 females considered incurable and harmless were put out to board in private families. One of the females proved to be unsuitable to remain, and was returned to the hospital. The number of deaths was 67,—36 males and 31 females. The hospital for another year has been free from any epidemic or large amount of sickness of any kind, the diseases most prevalent being, as usual, those of exhaustion in persons already enfeebled by age or chronic brain disorders.

Although the daily average number of inmates has been less this year than last, the number of admissions has been greater than in any year since the hospital was opened in 1877. Some 40 chronic and incurable cases were transferred to the Tewksbury Almshouse and the Westborough Hospital, and their places supplied by an equal number of similar cases from Danvers. Apart from the temporary pleasure of the day's outing, including the ride on the cars, which was afforded them by this trip, no improvement in their mental condition can be expected as a result of their change of residence. About 20 persons of the criminal class have been sent to the hospital during the year from the various penal institutions of the State. The impropriety and injustice of thus associating the criminal and innocent insane has been brought to the attention of the Governor and Council in many former reports. All the reasons and arguments there urged against the plan still exist, and might be repeated with equal force in this report. A partial attempt has been made at Bridgewater to provide for this class, but so far only the quiet and harmless ones, the least objectionable in the hospital, have been removed there. The last Legislature appropriated \$60,000 for erecting and furnishing strong buildings for insane male criminals at Bridgewater, and upon their completion this class should be sent directly there from the penal institutions, and not in the roundabout and expensive way now adopted of sending them first to the lunatic hospitals and from there to Bridgewater. Under the provisions of chapter 339 of the Acts of 1885, 10 habitual drunkards have been received. A hearing was given last year by the legislative committee on public charitable institutions, upon a petition for the establishment of an inebriate asylum. A large number of interested persons appeared,

and the matter was fully and forcibly presented to the committee; but they failed to secure a favorable report from them. As this subject has also been treated of in former reports of the hospital, it is not necessary to repeat what has been said in them. We can only hope that better success may attend the efforts in that direction in the future.

During the past year most of the cities and towns have declined to pay for the clothing, breakage and other damage done by patients for whose support they are liable. It has been the custom for years to put such charges on the quarterly bills, and they have been paid by the city or town where the patients had acquired a legal settlement. I understand that in the revision of the Public Statutes in 1882 the word "support" was substituted for the word "board" as it stood in the older section of the Statutes relating to this subject; and, as clothing and all other expenses are embraced in the former word, the cities and towns refuse to pay any more than \$3.25 per week. The matter was brought before the committee of the Legislature on public charitable institutions by the Trustees of the State hospitals, and the request made that the hospitals might either be allowed to charge for clothing, breakage, etc., or that the weekly rate might be raised to a sum sufficient to cover this expense. This request, which seems a reasonable one, was opposed by the overseers of the poor of all the cities who appeared at the committee hearing. As a result, a bill was reported fixing the weekly rate for pauper patients at \$3.40, this sum to include everything except burial expenses and charges for elopements. This bill passed the House, but failed in the Senate. The argument used against the increase of rate was that insune paupers were kept at the almshouses for less than the sum paid now to the hospitals. That this statement was manifestly unfair, even if true, is evident when we consider that the class of insane at the almshouses is composed of the quiet and on the whole tidy portion, requiring little or no medical attention and a much less number of attendants, and that when they become active and destructive they are immediately committed to one of the hospitals, where the damage they do to their clothing and the property of the institution may be for weeks twice

as much as is received for their board. More than this, if it meant anything, it was a plea for the return to almshouse treatment of the insane. That this is not the policy of the State is sufficiently evident from the expensive and commodious buildings, each one more expensive than the last, which it has erected for the care and accommodation of this class of its wards. One of two results must follow, and probably both will happen. Either the quality of the food and the number of the attendants will be reduced, or the moderate surplus of the hospitals, which is the capital upon which an economical and cash business is transacted, will be swept away, debts will be incurred, and the Legislature will be called upon to make up the deficiency in the running expenses. While such deficiencies in the expenses of the charitable institutions of the State have always been promptly made up by the Legislature, it should be remembered that a cash balance in the bank is none the less advantageous to an The result of the failure institution than to an individual. to reimburse this hospital for the expense of clothing, etc., has been a reduction of our cash balance by about \$6,000, while the standard of food and the efficiency and number of the attendants have been equal to that of former years. recommend that the Legislature be again asked to place the price of board, now lower than in any northern State, at a rate which will enable the institutions to be self-supporting, and furnish the unfortunate inmates with a reasonable number of the comforts of life which their malady prevents them from furnishing themselves.

The current expenses for the year, after deducting the amount received for sale of products and other articles, have been \$139,877.42. Dividing this amount by 708.19, the average number of patients for the year, we find the annual cost to be \$197.51, equivalent to \$3.798 per week for each patient.

The land on Shrewsbury Street, some twelve acres, which the Legislature of two years ago permitted the city of Worcester to occupy for the purpose of a public park, has been taken by the city, and various improvements made upon it to render it suitable for a pleasure ground. The Legislature also modified to a certain extent the conditions which the year before they imposed in the matter of granting the city permission to lay out and construct a highway through the hospital grounds bordering upon Lake Quinsigamond. Nothing has yet been done towards carrying into effect the provisions of this act.

The hospital library has been well patronized by both patients and employees. Two hundred and forty-two books have been added during the year, making the total number of volumes 1,721. The gifts to the institution have been newspapers, periodicals, pamphlets, and cards from the Hospital Newspaper Society; a number of volumes published by the Bureau of Agriculture, from Senator George F. Hoar; publications from the Agricultural College, Amherst; one copy of the "Worcester Evening Gazette," the "Daily Spy," the "Fitchburg Sentinel," the "Salem Gazette," the "American Traveller;" fruit from Mrs. George L. Clark.

There have been several changes in the corps of officers. Mr. George L. Clark, after seven years of very efficient service as steward, resigned in February. The vacancy was filled by the appointment of Mr. Henry J. Bardwell, and he assumed the duties of the office May 1. Dr. John A. Houston and Dr. Elizabeth Earle resigned their positions on the medical staff, the latter leaving in March and the former in August. These vacancies have been filled by the appointment of Drs. Hartstein W. Page and Laure Hulme; the former commenced service in August and the latter in September.

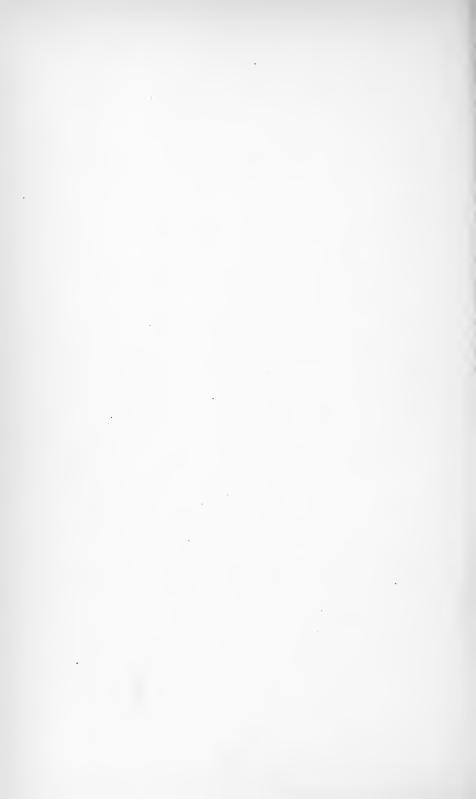

The successful management of an institution as large as this, with its many and complex concerns, can only be secured by the harmonious co-operation of the subordinate officers. To those who have been associated with me, and to the employees in the various departments who have given faithful and conscientious assistance in carrying on the work of the year, as well as to your Board, I wish to acknowledge my indebtedness.

JOHN G. PARK,

Superintendent.
